Socalytix.io
De-Risking Your Business

Advanced Cyber Threat Monitoring

Stay Ahead of Cyber Threats with Real-Time Intelligence and Actionable Insights

Socalytix operates in the Digital Risk Protection market, ensuring that our customers always stay ahead of potential risks.

Why Cyber Threat Monitoring is Critical for Your Business

In today's digital landscape, cyber threats are more sophisticated than ever. Businesses face constant risks from hackers, malware, and insider threats. Without proper monitoring, your sensitive data and operations could be at risk.

At Socalytix, we specialize in cyber intelligence to keep your business safe. Our technology and expert team continuously monitors your network, identifies potential threats, and provides you with actionable recommendations to prevent attacks before they happen.

Comprehensive Cyber Threat Monitoring & Intelligence

Real-Time Threat Detection: Our platform continuously scans your network for anomalies and potential threats, ensuring immediate identification of risks.

Behavioral Analysis Platform: We leverage cutting-edge behavioral analysis to monitor and profile individuals involved in criminal activities, allowing for precise and preemptive action.

Actionable Insights & Recommendations: We don't just identify threats; we provide you with detailed reports and strategic advice on how to mitigate risks and strengthen your security posture.

The Socalytix Process

1: Initial Assessment: We start with a comprehensive analysis of your current security setup and identify potential vulnerabilities.

2: Continuous Monitoring: Our platform monitors your systems around the clock, ensuring that any suspicious activity is detected immediately.

3: Detailed Reporting: You receive regular reports with detailed findings and tailored advice on how to address any issues we find.

4: Ongoing Support: Our team remains on hand to provide continuous support and updates, ensuring your business remains secure.

SOLUTION HIGHLIGHTS

- Based on open-source information (open web)
- Information is gathered through sites' official API

BEHAVIORAL ANALYSIS

- Data is gathered, analyzed and categorized
- Recommendations are provided according to the risk potential

Platform is GDPR compliant (European Privacy Regulations)
