

## Socalytix Profiler

### OSINT for Insider Treat Mitigation

#### Service Overview

Our background check system integrates advanced OSINT technologies, access to over 150 private information databases, and artificial intelligence to provide you with a complete, fast, and accurate profile of any individual. In a world where a single incorrect decision about one person can cause critical harm to the organization—from financial damage worth hundreds of millions to reputational destruction and security risks. The realization of such a threat can completely paralyze your organization's operational continuity — we give you an intelligence advantage you won't find elsewhere.
