

## **Protect the supply chain – safeguard your business future**

### **Don't Stay Exposed**

Comprehensive Assessment of Security, Cyber, and Operational Resilience in Your Supply Chain  
Today's threats are multi-dimensional:

From geopolitical tensions, sophisticated cyber-attacks, data leaks, operational disruptions, supplier failures, to physical damage to infrastructure – a single event can paralyze even the most secure organization.

True organizational resilience is built on the ability to *identify, assess, prepare for, and neutralize risks in time*, before they materialize. Our solution empowers security officers with full control and oversight of supply chain risk management—spanning security, cyber, physical, and operational domains.

### **About Our Solution**

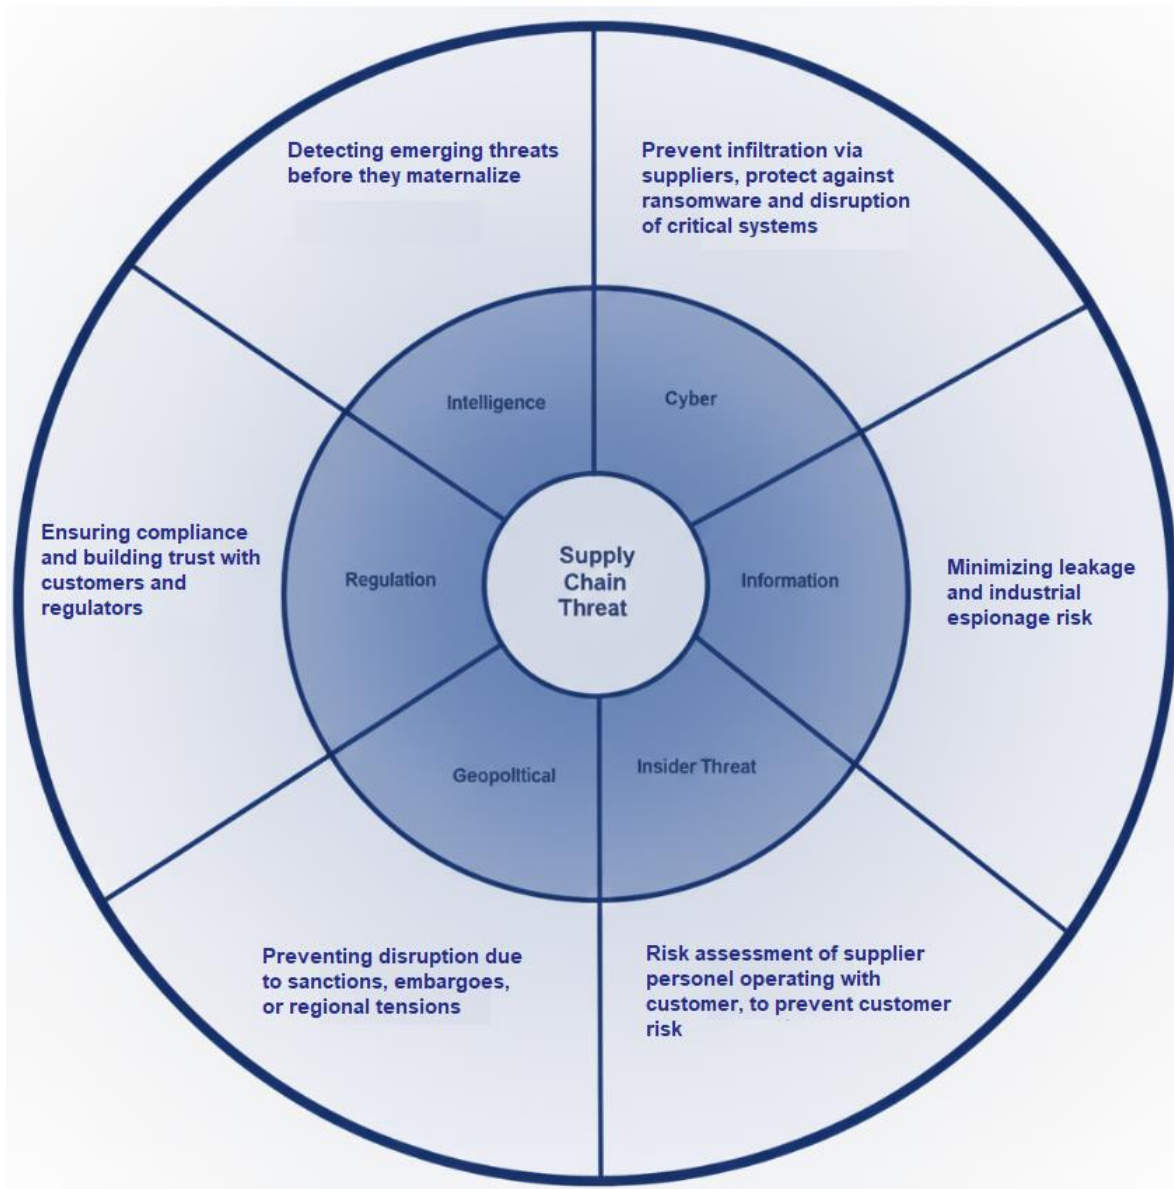

We specialize in smart analysis, mapping, and risk management for all supply chain elements. The solution integrates practical experience, security methodologies, analytical tools, and advanced monitoring technologies, providing organizations with:

- End-to-end visibility—from the smallest component to the largest supplier
- Ongoing monitoring of security and cyber risks
- Peace of mind for security teams and management—even in extreme scenarios

# Socalytix

Unveiling Your Risks

## What We Offer

### Comprehensive Security-Operational Mapping

- Identification of critical and exposed suppliers
- Pinpointing physical, logistical, and regulatory vulnerabilities
- Analysis of technological dependence and reliance on foreign countries or risk-prone regions

### **Cyber Risk Assessment and Management**

- Detection of supply chain attack attempts
- Assessment of protection level for sensitive information and trade secrets
- Exposure of vulnerabilities and evaluation of business continuity plans (BCP)

### **Holistic Security Resilience**

- Protection of digital information
- Detection of industrial espionage practices and internal leaks
- Analysis of the resilience of critical organizational systems during emergencies

### **Scenario Analysis and Resilience Testing**

- Compliance audits with security and regulatory standards (ESG, local and international regulations)

### **Monitoring and Control Systems**

- Dedicated dashboards for security officers
- Real-time alert platforms for risks and abnormal events
- Executive reports with actionable recommendations

### **Our Added Value**

- Multi-system approach: Integrates security, technology, intelligence, and operations
- Proven experience: Supporting organizations in the public, private, and government sectors
- Critical tools for security officers: Ongoing monitoring, focused risk identification, practical plans
- Crisis preparedness: Threat mapping, continuity forecasts, and processual resilience implementation

### **Why Now?**

- Prevent costly surprises—early detection of hidden risks
- Meet stringent security and regulatory requirements
- Transparency for management—certainty and control over your supplier network
- Organizational security—resilience ensures continuity even in multi-threat scenarios

## Why Choose Us?

- Dozens of leading companies in Israel already trust us — intelligent analytics, global expertise, and a customer-centric approach.
- Personal guidance and an expert team throughout every stage of the review and the practical implementation of recommendations.

## Schedule a Consultation Today!

Don't wait for the next disruption – Check your chain's resilience, gain insight, act effectively, and stay in control.

**Best Regards,**
